

750R & 750C CYCLES

exercice

NEW superior **DESIGN** **SAME outstanding** **QUALITY**

The CYBEX 750 series cycles provide distinct and compelling ways to improve your member's fitness experience whether they chose the 750C to train for the triathlon, or the 750R as they begin their journey to better fitness. The CYBEX 750C and 750R Cycles deliver more of what your members demand—from exceptionally low workloads for the beginner to the versatility available in the programming variety and three resistance modes.

*Shown with optional Personal Entertainment Monitor

750R & 750C CYCLES

The 750 Cycles feature the CYBEX hallmark split level design and “**Three View**” philosophy to simplify setup and provide the user essential information and controls they desire. The “**First View**” focuses on the Quick Start button highlighted in green for those who want to just get on and go with a minimum of fuss. The “**Second View**” focuses on the controls needed for program setup. Finally, the “**Third View**” focuses on the session information and user motivation through the use of “High Light Play” in the 10 by 15 graphic profiling. Each member of the 750 product family follows the same theme to allow members to move between machines effortlessly.

- Three modes of operation include:
 - “Bike Mode” which recreates the real world outdoor riding experience in Quick Start and Manual programs.
 - The control of Constant Power in its nine programs including Heart Rate Control with user selectable heart rate target.
 - The accommodating resistance of the Isokinetic mode that CYBEX pioneered.
- Added programming includes nine custom programs, manual constant power mode, manual isokinetic mode, and a fitness test.
- The self-tensioning single-stage drive and hybrid eddy-current self-generating brake provide high torque capabilities with exceptionally low drag to provide an exceptionally broad resistance range of 20 to 900 watts with superbly smooth operation.
- The 750R features a supportive seat back with back venting for added comfort while the seat base is optimized to conform to a wide range of users.

- The 750C features a one-hand seat adjustment accessible from the user position as well as contour molded handle bars that provide a variety of riding positions from upright to aero, and include dual heart rate monitoring contacts.
- The frame is designed to provide the most demanding user with the experience of a full and intense workout without the twisting found on lesser machines.
- The crank set is three-piece mountain-bike type made of forged steel for extreme durability.
- The pedals feature an exceptionally large foot space and are double-sided to provide the member the option of pedaling with or without the adjustable strap.
- For added user comfort, these cycles are equipped with two-speed fans.
- Optional CYBEX Personal Entertainment Monitors help the time go by as your members watch TV or their favorite videos, while the available wireless headphones provide unrestricted comfort.

one bike DOES IT ALL

For those who demand uncompromising performance and results, only the CYBEX 750 Series Cycles will satisfy the need. With three modes of resistance and a power range of 20 to 900 watts, these cycles are ideal for new users and high performance training for experienced athletes alike. The cycles are also part of the 750 Family, which has a completely fresh, stylish, and modern appearance to complement your facility. The cycles share the same 750 Family display, in addition to the state-of-the-art entertainment options.
